Fund objective

The fund aims to achieve a total portfolio return that outperforms the world equities market over the long term. The portfolio has a moderate level of risk and therefore seeks to provide a moderated exposure to volatility in the short term.

This fund is suitable for investors who are in their wealth accumulation phase, seeking a rand-denominated portfolio of international equities. Investors would be able to withstand short-term market fluctuations in pursuit of maximum capital growth over the long term.

¹ Performance is quoted from Morningstar as at month-end for a lump sum investment using Class A Net Asset Value (NAV) prices with income distributions reinvested (income is reinvested on the reinvestment date). NAV refers to the value of the fund's assets less the value of its liabilities, divided by the number of units in issue. Performance figures are quoted after the deduction of all costs incurred within the fund. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All performances are annualised (ie the average annual return over the given time period). Actual annual figures are available on request from Client Service.

The Kagiso unit trust fund range is offered by Kagiso Collective Investments Limited (RF) (Kagiso), registration number 2010/009289/06. Kagiso is a subsidiary of Kagiso Asset Management (Pty) Limited [a licensed financial services provider (FSP No. 784)], the investment manager of the unit trust funds. Kagiso is a member of the Association for Savings and Investment SA (ASISA) and is a registered management company in terms of the Collective Investment Schemes Control Act, No 45 of 2002.

Unit trusts are generally medium to long-term investments. The value of units will fluctuate and past performance should not be used as a guide for future performance. Kagiso does not provide any guarantee either with respect to the capital or the return of the portfolio(s). Foreign securities may be included in the portfolio(s) and may result in potential constraints on liquidity and the repatriation of funds. In addition, macroeconomic, political, foreign exchange, tax and settlement risks may apply. However, our robust investment process takes these factors into account. Unit trusts are traded at ruling prices and can engage in scrip lending and borrowing. Exchange rate movements, where applicable, may affect the value of underlying investments. Different classes of units may apply and are subject to different fees and charges. A feeder fund is a portfolio that invests in a single portfolio of a collective investment scheme, which levies its own charges and which could result in a higher fee structure for the feeder fund. A schedule of the maximum fees, charges and commissions is available upon request. Commission and incentives may be paid, and if so, would be included in the overall costs. Kagiso has the right to close the portfolio to new investors in order to manage it more effectively in accordance with its mandate. Additional information is available free of charge on our website or from Client Service.
