Unconventional thinking. Superior performance

Effective asset allocation exposure

The Kagiso unit trust range is offered by Kagiso Collective Investments Limited ('Kagiso') registration number 2010/009289/06, a member of the Association for Savings and Investment SA (ASISA). Unit trusts are generally medium- to long-term investments. The value of units may go down as well as up and past performance is not necessarily an indication of future performance. Unit trusts are traded at ruling prices and can engage in scrip lending and borrowing. Unit trust prices are calculated on a net asset value (NAV) basis, which is the total value of assets in the portfolio including any income accruals and less any permissible deductions (brokerage, Uncertificated Securities Tax, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio, divided by the number of units in issue. Instructions must reach Kagiso Collective Investments before 14:00 to ensure same day value. Fund valuations take place at approximately 15:00 each business day and forward pricing is used.

¹ A schedule of maximum fees and charges is available on request and on our website. Fees and incentives may be paid, and if so, are included in the overall costs.

² The TER is calculated as a percentage of the average NAV of the portfolio incurred as charges, levies and fees in the management of the portfolio for a rolling 12-month period to end June 2011. A higher TER ratio does not necessarily imply a poor return nor does a low TER imply a good return. The current disclosed TER cannot be regarded as an indication of future TER's.
