The manager is a member of ASISA.² Performance is quoted from Morningstar as at 31 January 2011 for a lump sum investment using Class A NAV prices with income distributions reinvested. Performance figures are quoted after the deduction of all costs incurred within the fund.² The TER is calculated as a percentage of the average NAV of the portfolio incurred as charges, levies and fees in the management of the portfolio for a rolling 12-month period to end December 2010. A higher TER ratio does not necessarily imply a poor return nor does a low TER imply a good return. The current disclosed TER cannot be regarded as an indication of future TER's.
