

The fund was up 2.8% over the final quarter, underperforming its benchmark of Global Equity General funds mean (up 9.3%). The fund underperformed its benchmark over the past year by 10.8% (up 19.6%). Over the past three years, the fund was up 7.9% (versus the benchmark up 10.8%).

Economic backdrop

Global economic activity should remain firm, benefiting from easing financial conditions and strong developed market real household income growth due to sharply falling inflation and higher wages. The US economy is demonstrating particular strength, with a relatively strong consumer underpinned by a very robust labour market and high aggregate household wealth.

Europe's economy, which has stagnated given its linkage to China's weak economic recovery, should benefit meaningfully from a rebound in global manufacturing activity (from low levels) and the ongoing normalisation lower of gas prices. In Japan, continued export growth, improving business investment and private consumption (due to re-emergent wage growth and aided by a large once off personal tax refund) is leading to sustained solid economic activity.

The Chinese economy's recovery has fallen well short of expectations following the lifting of prolonged pandemic lockdown restrictions. Although contact-intensive service industries have experienced a strong recovery, property market activity has been very weak for a sustained period and has depressed consumer confidence. A recovery in exports, manufacturing and infrastructure spending, along with more decisive government stimulus measures should result in stronger near-term growth.

Economic activity in South Africa is severely constrained by an inadequate electricity supply, acute underperformance of transport infrastructure, poor service delivery from weak and revenue-hungry municipalities and chronically low business confidence. Additionally, the economic contribution from the mining sector that has benefitted from high commodity prices, is now far lower. For these reasons, coupled with the sizable government debt burden and a large, unskilled population with high unemployment - we remain pessimistic regarding the structural growth rate for the local economy. Gradual steps by government toward economic reform (now involving more productive private sector partnerships) need to speed up in order to stabilise the economy and prevent further decline.

Markets review

Global markets were strongly positive in the final quarter (up 11.5% in US dollars), with Germany (up 13.9%) and the US (up 11.7%) outperforming. Emerging markets were also positive in the period (up 7.9%), with outperformance from Brazil (up 19.1%), South Korea (up 15.5%) and South Africa (up 12.7%), while China (down 4.2%) and Turkey (down 12.1%) underperformed. 2023 was a very positive year for global equity markets that were up 24.4% overall.

Fund performance and positioning

Key positive contributors were Hochtief, Bayer and SKF. Global equity detractors included Pfizer, Johnson Electric and Roche. We remain overweight European equities and substantially underweight US equities relative to our benchmark.

Disclaimer

The Camissa unit trust fund range is offered by Camissa Collective Investments (RF) Limited (Camissa), registration number 2010/009289/06. Camissa is a subsidiary of Camissa Asset Management (Pty) Limited [a licensed financial services provider (FSP No. 784)], the investment manager of the unit trust funds. Camissa is a member of the Association for Savings and Investment SA (ASISA) and is a registered management company in terms of the Collective Investment Schemes Control Act, No 45 of 2002.

Unit trusts are generally medium to long-term investments. The value of units will fluctuate and past performance should not be used as a guide for future performance. Camissa does not provide any guarantee either with respect to the capital or the return of the portfolio(s). Foreign securities may be included in the portfolio(s) and may result in potential constraints on liquidity and the repatriation of funds. In addition, macroeconomic, political, foreign exchange, tax and settlement risks may apply. However, our robust investment process takes these factors into account. Unit trusts are traded at ruling prices and can engage in scrip lending and borrowing. Exchange rate movements, where applicable, may affect the value of underlying investments. Different classes of units may apply and are subject to different fees and charges. A schedule of the maximum fees, charges and commissions is available upon request. Commission and incentives may be paid, and if so, would be included in the overall costs. Camissa has the right to close the portfolio to new investors in order to manage it more effectively in accordance with its mandate. Additional information is available free of charge on our website or from Client Service.
