<sup>1</sup> TER (total expense ratio) = % of average NAV of portfolio incurred as charges, levies and fees in the management of the portfolio for rolling one and three-year periods to 31 March 2025. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs. Inclusive in the TER, a performance fee of 0.0% of the net asset value of the class of financial product was recovered.

<sup>2</sup> TC (transaction costs) are unavoidable costs incurred in administering the financial products offered by Camissa Collective Investments and impact financial product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of financial product, the investment decisions of the investment manager and the TER. This is also calculated on rolling one and three-year periods to 31 March 2025.

\* The Sharpe ratio is used to measure how well the return of an asset compensates the investor for the risk taken. The higher the Sharpe ratio the better the Fund's historical risk-adjusted performance has been. This is calculated by taking the difference between the Fund's annualised return and the risk-free (cash) rate, divided by the standard deviation of the Fund's returns.

<sup>1</sup> Performance is quoted from Morningstar as at month-end for a lump sum investment using Class A Net Asset Value (NAV) prices with income distributions reinvested (income is reinvested on the reinvestment date). NAV refers to the value of the fund's assets less the value of its liabilities, divided by the number of units in issue. Performance figures are quoted after the deduction of all costs incurred within the fund. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All performances are annualised (ie the average annual return over the given time period). Actual annual figures are available on request from Client Service.

The Camissa unit trust fund range is offered by Camissa Collective Investments (RF) Limited (Camissa), registration number 2010/009289/06. Camissa is a subsidiary of Camissa Asset Management (Pty) Limited [a licensed financial services provider (FSP No. 784)], the investment manager of the unit trust funds. Camissa is a member of the Association for Savings and Investment SA (ASISA) and is a registered management company in terms of the Collective Investment Schemes Control Act, No 45 of 2002.

Unit trusts are generally medium to long-term investments. The value of units will fluctuate and past performance should not be used as a guide for future performance. Camissa does not provide any guarantee either with respect to the capital or the return of the portfolio(s). Foreign securities may be included in the portfolio(s) and may result in potential constraints on liquidity and the repatriation of funds. In addition, macroeconomic, political, foreign exchange, tax and settlement risks may apply. However, our robust investment process takes these factors into account. Unit trusts are traded at ruling prices and can engage in scrip lending and borrowing. Exchange rate movements, where applicable, may affect the value of underlying investments.
