The Kagiso unit trust fund range is offered by Kagiso Collective Investments Limited (Kagiso), registration number 2010/009289/06, a voting member of the Association for Savings and Investment SA (ASISA). Kagiso is a subsidiary of Kagiso Asset Management (Pty) Limited (a licensed financial services provider (FSP No. 784)), the investment manager of the unit trust funds. Unit trusts are generally medium to long-term investments. The value of units will fluctuate and past performance should not be used as a guide for future performance. Unit trusts are traded at ruling prices and can engage in scrip lending and borrowing. Exchange rate movements, where applicable, may affect the value of underlying investments. Different classes of units may apply and are subject to different fees and charges. A schedule of the maximum fees, charges and commissions is available upon request. Commission and incentives may be paid, and if so, would be included in the overall costs. All funds are valued and priced at 15:00 each business day and at 17:00 on the last business day of the month. Forward pricing is used. The deadline for receiving instructions is 14:00 each business day in order to ensure same day value.

<sup>1</sup> Performance is quoted from Morningstar as at month-end for a lump sum investment using Class A Net Asset Value (NAV) prices with income distributions reinvested. NAV refers to the value of the fund's assets less the value of its liabilities, divided by the number of units in issue. Performance figures are quoted after the deduction of all costs incurred within the fund.

<sup>2</sup> The Total Expense Ratio (TER) is calculated as a percentage of the average NAV of the portfolio incurred as charges, levies and fees in the management of the portfolio for a rolling 12-month period to end March 2013. A higher TER ratio does not necessarily imply a poor return nor does a low TER imply a good return. The current disclosed TER cannot be regarded as an indication of future TERs.

## Commentary

Developed equity markets rebounded strongly during the quarter. Positively interpreted comments from the US Federal Reserve officials contributed to US equities gaining 10%, propelling the S&P 500 index to a new high. The Japanese equity market was a strong performer, with the Nikkei 225 index gaining 19.3%. European equities gained 5% during the period, underperforming the global market as debt related concerns in Cyprus seemed to dampen investor sentiment. The MSCI Emerging Markets index was down 9.7% (in US dollar terms).

Most commodities relevant to South African miners lost ground in US dollar terms. Gold was down 4.6% and copper lost 7.1%. Platinum, however, was up 3.5%. The oil price (Brent Crude) rose above US\$120/barrel for the first time in almost a year, but fell back as the US showed strong inventory figures, ending the quarter 2.2% lower.

Locally, weak export demand, buoyant but slowing consumer spending, slow infrastructure development and chronic labour unrest in the mining, transport and agricultural sectors all contributed to a sluggish economy. This, along with a high current account deficit, negatively affected the rand, which was the worst performing emerging market currency over the quarter. During this period, the rand lost 8.1% and 5.3% respectively against the US dollar and the euro.

Despite deteriorating macroeconomic fundamentals, the South African equity market continued to set new records, with the FTSE/JSE All Share index reaching an all-time high of 40984 in March. The FTSE/JSE All Share index gained 2.5% over the quarter, with industrials up 6.3%, and financials up 5.9%. Resources (down 6.0%) continued to be weighed down by weakening commodity prices in part from weaker Chinese demand, as their economic growth moderates. However, the weaker rand should provide some support to resources earnings in the short term.

The fund delivered a return marginally below its benchmark, the FTSE/JSE Top 40 Index, over the quarter driven in part by costs incurred from significant index changes that necessitated trading. The fund continues to closely track its benchmark, the FTSE/JSE Top 40 Index, and closed the quarter up 2.0%.
