What is this product?

Type

This is an investment fund established as an Irish Collective Asset-Management Vehicle (ICAV).

Objectives

Investment objective The investment objective of the Fund is to achieve a total portfolio return that is better than the world equity market, over the long term.

Investment policies The principal focus of the investment policy of the Fund is to invest in shares of companies that are listed on Recognised Markets. Up to 35% of the Fund's Net Asset Value may be invested in equities listed in countries considered emerging markets.

Up to 10% of the Fund's Net Asset Value may be invested in eligible collective investment schemes.

The Fund may, on occasion, invest up to 30% of its Net Asset Value in bonds of global, corporate and government issuers which may be fixed and/or floating rate with a broad spectrum of ratings rating from Investment Grade to below Investment Grade and unrated paper and to preferred stock and rights of global issuers that can be exchanged into shares of a company's common stock.

The Fund may also invest in financial derivative instruments ("FDI"), namely equity index options and equity index futures for efficient portfolio management purposes to hedge against equity fluctuations.

The Fund may, for defensive or investment purposes, hold up to 80% in cash and cash-like instruments for cash flow purposes or as part of a temporary defensive strategy. The Fund will also invest in FDI to reduce the Fund's risk exposure to adverse fluctuations in currency exchange rates or to manage the Fund more efficiently.

Benchmark The Fund is actively managed by the Investment Manager and measures its performance against the FTSE All World Index for performance comparison purposes only. While the Fund may invest in the constituents of an index, from time to time, it will be actively managed and investments in the portfolio will not be specifically selected from the constituents of that index. Accordingly, the Fund's investment policy will in no way be constrained and the degree of deviation from any index, in whose constituents the Fund may invest, may be significant.

Redemption and Dealing You can buy and sell your shares in the Fund on each day of every week provided it is a business day (when banks in Dublin are open).

Distribution Policy It is not the intention to distribute dividends to Shareholders.

Launch date Fund launch date: 18/06/2018. Share class launch date: 18/06/2018.

Fund Currency The Fund's base currency is USD.

Switching You may switch your shares in the Fund to other shares of the Fund in which you are eligible to invest. Further information is available from the Administrator.

Intended retail investor

This product is intended for investors who plan to stay invested for at least 5 years and are prepared to take on a medium level of risk of loss to their original capital in order to get a higher potential return. It is designed to form part of a portfolio of investments.

Term

The Fund is open-ended and has no maturity date. Subject to the liquidation, dissolution and termination rights of the board of the Fund as set forth in the Fund prospectus, the Fund cannot be automatically terminated. The manufacturer, Camissa Asset Management (Pty) Ltd (the "Investment Manager"), is not entitled to terminate the product unilaterally.

What are the risks and what could I get in return?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Performance scenarios

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

The stress scenario shows what you might get back in extreme market circumstances.

Unfavourable: this type of scenario occurred for an investment between 31 May 2021 and 30 September 2022.

Moderate: this type of scenario occurred for an investment between 31 January 2014 and 31 January 2019.

Favourable: this type of scenario occurred for an investment between 31 January 2013 and 31 January 2018.

Recommended holding period		5 years

What happens if the Fund is unable to pay out?

If we are not able to pay you out what we owe you, you are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depositary. Should we default, the depositary would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,

■ 10,000 USD is invested.

Example Investment 10,000 USD	if you exit after 1 year	if you exit after 5 years (recommended holding period)
Total Costs	839 USD	1,243 USD
Annual cost impact*	8.4%	2.1%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 5.2% before costs and 3.1% after costs.

Composition of costs

One-off costs upon entry or exit		Annual cost impact if you exit after 1 year
Entry costs	5.00% of the amount you pay in when entering the investment may be charged.	500 USD
Exit costs	3.00% of your investment before it is paid out to you may be charged.	300 USD
Ongoing costs taken each year		Annual cost impact if you exit after 1 year
Management fees and other administrative or operating costs	0.20% of the value of your investment per year. This is an estimate based on actual costs over the last year.	20 USD
Transaction costs	0.19% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	19 USD
Incidental costs taken under specific conditions		Annual cost impact if you exit after 1 year
Performance fees	There is no performance fee for this product.	0 USD

A charge of 1% may be payable when a Shareholder switches shares in the Fund more than twice in one year.

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

This product is designed for longer term investments; you should be prepared to stay invested for at least 5 years. However, you can redeem your investment without penalty at any time during this period, or hold the investment longer. Investors can buy and redeem Shares on each day of every week that is a business day in Dublin.
